

Pressure Ulcer Workshop

Wednesday 10th September 2008

- 09.25 - 09.35 Welcome & Introduction *Jon Busby*
- 09.35 - 11.40 What do we really know about the role of shear in pressure ulcer aetiology?
Lyn Phillips
- How much shear is clinically relevant?*
- An update from the leading edge of research within the international consensus group: Shear Force Initiative
- Heel ulcers – the growing epidemic.
Jon Busby
- How epidemiological pressures, changes in nursing practice and the design implications of support surfaces can influence the incidence of heel ulcers?
- Cushions or casualties?
Lyn Phillips
- Are we failing our seated, immobile patients?*
- European clinical audit data identifies persistent trends in the lack of care for seated patients, should we expand our horizons and look for different solutions?
- Do appearances deceive?
Jon Busby
- Understanding the design implications of therapeutic surfaces: form and function
- Counting or being accountable?
Lyn Phillips
- Are we missing the point of clinical audit?*
- A discussion about whether a shift in emphasis is overdue: from simply counting the frequency of adverse events such as pressure ulcers and DVT's, to focussing on improving the quality of care delivered.

Questions & Answers

Registration Form - (Please photocopy or scan this page)

Title (Prof. Dr. Mr. Ms. Mrs.)

Surname Name

Home Address

Postcode

Telephone Mobile

Email Address

Your Job Title

Special requirements (dietary, disability)

Signature..... Date.....

Payment

Conference fees - Please circle requirements

Options	MASC Member	Non-Member
